

# THE MED CENTER ANNOUNCES NEW PARKING PLAN AND TRAFFIC ROUTING

Due to construction, it is necessary to adjust our traffic patterns and parking around the hospital. A new Womens' Center will be built immediately north of the hospital (**see A**). Approximately 70 parking spaces will relocate to other areas of the hospital campus. To help alleviate traffic flow, a new hospital entrance/exit has been opened on Fifth Street near Union Avenue (**see B**). Outpatient services should use the new entrance (**B**). Emergency Room services and parking should be accessed by using the Fifth Street entrance near Flenniken Street (**see C**) west of the new construction.

Completion of the new Womens' Center should take approximately 15 months. We appreciate your understanding during this time of progress and expansion as we continue to provide *the right healthcare ...right here.*
